

UNDERWOOD 2018

VISION READY LEADER GOVERNOR

Caucus Letter For Caucus Goers

My name is Erik Underwood, our theme is, "Outward - Inward...From Rural Colorado to Urban Colorado and Everyone In - Between". I have a very unique story to share. I am a Coloradan from 3 housing projects born to a single parent, who had a little help and luck along the way. My experience comes in multiple waves. I use to work in the United States Senate as a staffer in Washington, D.C. I also founded a tech company called My24, securing a \$102 million dollar joint venture with AT&T (2012). I'm running for Governor, because I believe that through the determination I developed growing up, and the vision I have for our State; I can accomplish what is needed for everyone to become successful in Colorado. We need to create access to opportunities here in our State! We cannot afford to leave anyone behind!

Notwithstanding my support for universal healthcare; here are some of my progressive ideas and solutions that are resonating with other Coloradans.

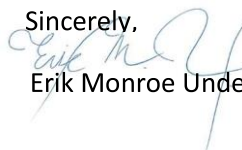

1. I will repeal Tabor. I'm the only candidate that wants to repeal Tabor through a 4 step plan.
2. I have a plan for Free In - State Tuition to a Public College, University, or Trade School called, The Colorado Hope Grant. Plan will be funded from excess State lottery revenues.
3. My plan, Come Out Of The Shadows program, (COOTS) will allow all undocumented immigrants to become a legal state resident of Colorado through a process.
